

Biofuel sustainability documentation

Issued by Preem Norge AS

General information

Customer A Visnes Transport AS

Product Etanol

Quantity 19,000 m³

Delivery period 2021

Issued 15 December 2022

Note ref. Preem-NO-151220220552

Background

The products covered by this declaration complies with the EC Renewable Energy Directive (RED) on the promotion of use of energy from renewable sources.

GHG values in the document includes feedstock transportation, possible pre-treatment, biofuel production, product transportation to customer location and distribution. The biomass used to produce the products fulfills all sustainability criteria according to RED Article 17 and local Norwegian legislation.

The production plant has been in operation on or before 5 October 2015.
